

BETA XYLANASE

PROTEASE

LIPASE

ALPHA-AMYLASE

PHYTASE

CELLULASE

PECTINASE

ENRICHZYME FSTM

**Perfect Blend Of Stabilized Multi-enzymes That Improves
The Digestibility Of Feed stuffs For Poultry**

ENRICHZYME FS™

Perfect Blend Of Stabilized Multi-enzymes That Improves The Digestibility Of Feed stuffs For Poultry

Composition : each kg contains

Endo-1-4 beta Xylanase , Protease(acid,neutral & alkaline), Alpha-Amylase, 6-Phytase, Cellulase, Lipase, Pectinase

A cost effective enzyme combination to maximize performance Exogenous enzymes supplemented to feed are capable for improving digestibility of feed by hydrolyzing the substrates {NSPs} that hinders digestion and specific anti-nutritional factors.

Action & benefits of Enrichzyme

ENRICHZYME FS	Unit / kg	Substrate	Benefits
Endo-1-4 beta Xylanase	10000000	Arabinoxylan	Causes breakdown of NSP, decreases viscosity of digesta & loose droppings
Protease (acid,neutral & alkaline)	4000000	Animal & Plant protein	Improves digestibility & availability of protein
Alpha-Amylase	1000000	Starch	Improves digestibility of starch & there by availability of nutrients
6-Phytase	1200000	Phosphorus	Enhances phosphorus absorption. There are 7 enzymes in composition
Cellulase	900000	Cellulose, hemicellulose, lignocellulose	Improves fibre digestion & allows high fibre diet
Lipase	80000	Fats & triglycerides	Improves digestibility of fat
Pectinase	120000	Pectin	Improves absorption of nutrients

Benefits :

- Increases digestibility of carbohydrate, protein and fat
- Reduces viscosity of ingesta in the gut
- Releases Ca & micr onutrients and increases available phosphorus
- Increases digestibility of carbohydrate, protein and fat
- Efficient within variable pH of GI Thigher concentration of Xylanase & Amylase to address the resistant starch in unlocking the true potential of corn, soya and other ingredients used in feeds. Glavenza also contains phytase and 8 other NSP enzymes for ensuring highly effective results in compound feeds.
- Breaks complex protein molecules into smaller peptides & amino acids for easy absorption
- Expands the use of alternative protein sources

Recommended Usage

Broiler : 250 gm/ton of feed

Layer : 200 gm/ton of feed

No need to add extra phytase enzyme in feed

Presentation : 20 kg
