

**Viral respiratory outbreaks
have brought
Serious Economic Losses
to the poultry industry**

VIRO-SIL

Protection against Viral Threats

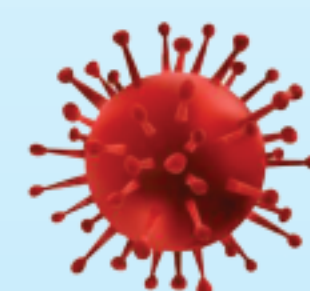

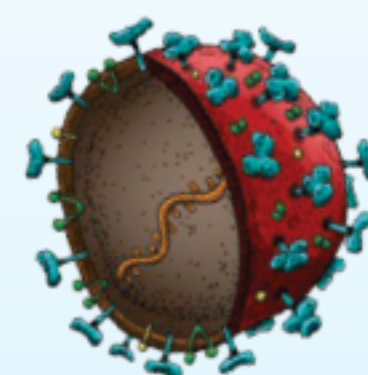

VIRO-SIL

Protection against Viral Threats

Viral infections pose a serious threat to the entire flock. A strong immune system is crucial for birds, as it identifies and combats foreign invaders such as bacteria, viruses, fungi, and environmental stressors that weaken natural immunity.

Protection against viral threats- against **NDV and IBDV. AIV**.

To Re-develop and strengthen this defence mechanism, regular supplementation with immunomodulators is essential.

Composition :

A Natural composition of Medicinal Herbs and Biochemical combination Potentiates with Phytogenetic compounds.

Benefits :

- Protects against viral threats
- Natural immunomodulator & virus-shielder
- Highly effective in managing stress
- Enhances immunity
